A production method and design aesthetic that predates the 20th century. Encaustic cement tiles in a classic earth tone palette.

MEMORY SERIES

INSTALLATION & MAINTENANCE

- Encaustic cement tiles are 100% natural artisanal products made 100% by hand with natural materials and manual practices. As with any handmade good, some degree of imperfections should be anticipated and celebrated!
- Inspect all product prior to installation for any visible defects or unacceptable color/shade variation. Claims are not accepted after installation. Mixing from multiple cartons is recommended during installation.
- Soak tile for 30 seconds prior to installation. Install using polymer or latex modified thin set mortars. For best results, tile should be back-buttered with mortar.
- For best results cutting, use a wet saw or angle grinder with a continuous rim finishing masonry blade.
- Before grouting follow mortar manufacturer's instructions to allow for full cure of thin set - usually 36 to 48 hours. Grout release is recommended prior to grouting. If using a contrasting grout color, we suggest a mockup as some darker colors can cause surface staining and affect the appearance.
- After initial wash ensure all remaining "grout haze" is buffed off with a dry cloth before 24 hours have elapsed.
